**RE: Partnership to Distribute African Fable Books for Fundraising**

Dear Executive Board:

This letter is to advise that United African Educational Foundation (UAEF) is exceptionally happy with Innovative Science and Technology Group's (ISTG) decision to become an official distributor of our educational outreach series of African Fables and Tales as a means of fundraising for your various educational programs. This arrangement is effective as of December 23, 2015 through December 31, 2018.

With the status of an official distributor of our series, ISTG is authorized to promote and market these books with the utmost care for professionalism, and to retain for its needed and worthy mission 50% of the dollar amount of each copy that it sells.

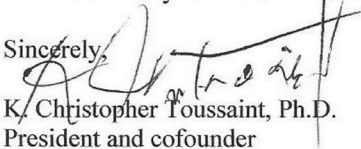

As you know, UAEF is a nonprofit, charitable organization with the broad aim of addressing more directly the educational needs and aspirations of school children of African descent in the United States and other parts of the world and that the unique series of books we produce has received endorsements from a number of School Boards and Districts, such as the School District of Philadelphia, the Trenton Board of Education and the Newark Public School District, and others.

You are also aware that apart from the series promoting good social values in children and youth and being rated truly excellent literacy books for grades 5 through 8 by the School District of Philadelphia, the series, more importantly, is completely compatible with ISTG's broad mission to bring out the best in young people in the way of talent and to encourage them to succeed in life in extraordinary ways ([www.uaef.org](http://www.uaef.org)).

Needless to say, we are highly impressed with ISTG's track record of providing much needed educational opportunities for youth that are underrepresented in the sciences and engineering here in the United States and in the Caribbean and Africa. We encourage ISTG to keep up its good work and firmly believe that it is bound to bear good fruit in the foreseeable future as these trained and dedicated young persons begin to apply their knowledge, skills, and services to their respective communities.

United African Educational Foundation looks enthusiastically forward to this important partnership with ISTG and firmly believes that it will be of mutual benefit to both our organizations.

Sincerely,

  
K. Christopher Toussaint, Ph.D.  
President and cofounder
